

NEW FUNCTIONALITY ADDED

- I wanted to show in the “Earthquake City Map” Airports markers as well as city markers to see the Airports in the threaten zone of an earthquake as with the cities.
- I added two buttons, one to see city markers and another one to see airports markers. By default I show cities.
- If we click in “Show Airports” button cities are hidden.
- If we click in “Show Cities” button airports are hidden.
- If we click in “Show Airports” button and after that we click in an earthquake, we can see the Airports in the threaten zone of the earthquake.
- I believe this functionality can be very useful, because it shows a critical information.
